Automatic and Semi-automatic Cot Grinding SZ2 A EASY

Application

Rosink's new machine SZ2 A EASY serves simple storage, double side magazine, fully automatic grinding of all centre guided top rollers. This new generation offers clever modular design for flexible workshop solutions, to cover multiple applications ; including semi-automatic grinding of long cots, OE, Airjet, texturizing. Neuenhauser textile automation design on board!

Advantages

- > High production output; up to 500 arbors per hour!
- > Individual 2 sides storage; up to 180 arbors! Individual use of left side and right side possible
- > Automatic measuring system of all cot diameters
- > Very accurate grinding; amount (differential) or diameter grinding in 1/100 mm steps
- > Superior 410mm wide grinding stone for full surface contact grinding
- > Guaranteed parallel positioning by double drive shafts
- > Guaranteed first class grinding result with freely adjustable smoothness value (Ra), e.g. 0.4 - 1.0 μ m
- > Applicable for all kind of rubber cots: short staple semi-worsted and worsted top rollers
- > For ring spinning, compact, OE, air-jet and flyer
- > Convenient and easy operation through touch screen multilingual display in most local languages
- > Just enter the required amount to take off or the desired final outside diameter of the rubber cots
- > Sorting function of over -and undersized cots automatic measuring system of all cot diameters

SZ2 A Easy	
Power	5,2 KW
Dimensions	1500 mm x 1300 mm x 1400 mm
Net Weight	700 kg

- > SZ2 HA therefore Basic Machine on board (see next pages also)
- > Suitable for all kind of rollers in semi-automatic mode
