Grinding Roller RSM

Rosink

Grinding Apparatus RGA

Application

The Rosink Grinding Apparatus is destined for equalizing and sharpening of metallic card clothing and when grinding card cylinders made of cast iron and steel.

Advantages

- > Very smooth and precise running.
- > Easy operation.
- > Length of traversing way and speed infinitely variable.
- > Integrated dressing device.

Machine RGA	
Electric Power Motor	0,55 kW
Electric Power Traversing Motor	0,1 kW
RPM	1800 min-1
Traversing speed	0 - 14 m/min
Surface speed of grinding stone	20 m/s
Weight	approx. 45 kg (60 kg)
Lenght	approx. 1900 mm (2400 mm)
Grinding tube diameter	110 mm
